

Economic Impact of Proposed Casino

Client

Private Client

Facts

Period 1999

Project Country United States

For a private client, Economic Development Research Group, now EBP, assessed the potential economic impact of a new casino on the city and state. The analysis considered the role of the casino in bringing in out-of-state spending, as well as redistributing spending within the state. Impacts on jobs, income and business activity, and associated local and state tax revenues, were also examined.
