

Practices for Evaluating the Economic Impacts and Benefits of Transit (TCRP Synthesis 128)

Client

Transportation Research Board's (TRB's)
Transit Cooperative Research Program

Facts

Period 2017

Project Country United States

For the Transportation Research Board's (TRB's) Transit Cooperative Research Program (TCRP), EBP (formerly EDR Group) performed the research study, "TCRP Synthesis 128: Practices for Evaluating the Economic Impacts and Benefits of Transit."

The report provides state-of-the-practice information for transit agencies to help them in incorporating economic benefits and impacts into their decision-making processes, which may lead to more sustainable funding solutions for transit agencies. The document describes the methods used for assessing transit economic impacts and benefits, the types of effects that are covered by these methods, and the ways that agencies are using the information obtained for planning, prioritizing, funding, and stakeholder support.
